Email: beko1986@gmail.com

Professional Summary

Software Developer and IT Professional with over **17 years of experience** in IT systems, software development, and cloud technologies. Experienced in building web applications, managing servers, and developing IoT systems. Skilled in backend and full-stack development, ERP systems, and AI-assisted development tools. Passionate about creating scalable solutions and automating business processes through modern technologies.

Technical Skills

Programming & Development

- JavaScript
- Python
- Node.js
- React
- Laravel
- ASP.NET
- REST APIs

AI & Modern Development Tools

- AI-Assisted Development (ChatGPT, Google Gemini, AI coding assistants)
- Prompt Engineering
- AI tools for automation, development and productivity
- Generative AI concepts and workflows

Systems & Cloud

- Linux Server Administration
- Windows Server
- AWS Cloud Services
- OpenStack
- Docker & Containerization
- Git Version Control

Databases

- MySQL
- PostgreSQL
- MongoDB
- Database Design

IoT Development

- IoT Systems Architecture
- Sensor Integration
- Data Acquisition Systems
- Node-RED Development
- ThingsBoard Platform
- OpenRemote Platform
- Industrial IoT Monitoring Solutions

ERP & Business Systems

- Odoo ERP Implementation
- Odoo Functional Configuration
- Business Process Analysis
- ERP System Customization
- ERP User Training and Support

Other Technical Skills

- WordPress Development
- Web Hosting & cPanel
- System Monitoring & Troubleshooting
- Email Systems Administration

Professional Experience

IT & Systems Coordinator

Naif Obaid Al-Shammari Contracting Establishment – Saudi Arabia

March 2024 – Present

- Administer and manage **Daftra ERP system** including invoicing, reports, and system users.
- Manage internal digital workflows and business systems.
- Support IT infrastructure and technical operations.
- Implement digital solutions to improve operational efficiency.

Web System Administrator & IoT Software Developer

Gezira Telecom Solutions – Sudan
Feb 2021 – Jun 2023

- Developed software applications for IoT platforms and connected devices.
- Built systems for data collection and remote monitoring.
- Integrated IoT platforms with web applications and databases.
- Performed testing and optimization for security and performance.
- Implement and support **Odoo ERP system**, including installing, functional configuration and business process mapping

IT Technical Support & System Administrator

Gezira Hila Impex Co. Ltd – Sudan
Aug 2009 – Jan 2021

- Provided enterprise IT support and infrastructure maintenance.
- Managed servers, backups, and system updates.
- Configured networks, user accounts, and security policies.
- Implemented internal IT solutions and documentation systems.

Education

Bachelor of Computer Science and Information Technology
Sudan University of Science and Technology – Sudan
2010

Certifications

Google IT Support Professional Certificate – 2025
Meta Back-End Developer Certificate – 2025
Google AI Essentials – 2025
AWS Cloud Technical Essentials - 2025
Google Generative AI Learning Path – 2025
EF SET English Certificate C2 – 2023

Key IoT Projects

Fuel Tank Monitoring System

Client: **Canar Company**

Duration: **2022 – 2023**

- Developed an IoT system to **measure and monitor fuel levels in storage tanks**.
- Integrated sensors with IoT gateways to collect real-time fuel data.
- Implemented remote monitoring through a web dashboard.
- Designed data collection and transmission systems for accurate fuel tracking.

Electrical Transformer Monitoring System

Client: **Sudanese Electricity Company**

Duration: **2022 – 2023**

- Developed an IoT-based system for **monitoring electrical current in power transformers**.
- Integrated sensors and data acquisition devices to capture electrical measurements.
- Implemented remote monitoring to track transformer performance and detect anomalies.
- Enabled centralized monitoring through IoT platforms and web interfaces
